WE ONLY USE THE BEST OF THE BEST

REC SOLAR PANELS

FEATURES	HOW YOU BENEFIT
✓ Proven in independent testing by Photon and the Fraunhofer Institute to output exceptional power in real world conditions	✓ More power for each watt installed
✓ Superior panel performance in low light and high temperature	✓ Maximises the amount of power generated in varying conditions
✓ Anti-reflective glass technology	✓ Each panel collects more sunlight
✓ Low iron solar glass	✓ Improves sunlight transmission through the glass
✓ Highly automated production process	✓ Less human error and reduced tolerances between solar panels
✓ Smart design and reliable production	✓ Reduces effect of degradation to ensure reliable ongoing energy generation

SMA INVERTERS

FEATURES	HOW YOU BENEFIT
✓ Built using world leading German technology	✓ Industry leading efficiency ratings give you more usable power from the system
✓ Bluetooth functionality if required	✓ Can connect to office PC to monitor performance
✓ Transformer-less technology	✓ Improves inverter efficiency so you get more usable power from your system
✓ Robust IP65 enclosure	✓ Suitable for outdoor installations
✓ Built with wide output range	✓ Improves efficiency in varying light conditions

Solahart
ENERGY Free FROM THE SUN®

SOLAHART COMMERCIAL

SOLAR POWER

FREE ENERGY FOR AUSTRALIAN BUSINESS AND INDUSTRY

Solahart
ENERGY Free FROM THE SUN®

REDUCE YOUR ENERGY BILLS AND CREATE A MORE SUSTAINABLE BUSINESS

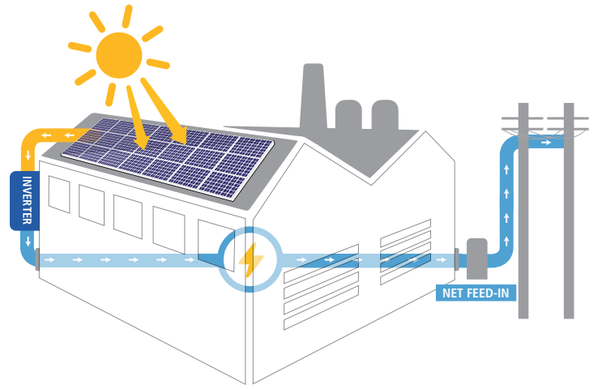
Solahart Commercial specialises in solar solutions for businesses large and small. We go to extreme lengths to ensure our systems provide you with worry-free, trouble-free energy for years to come. Don't risk your solar investment. Talk to Solahart today.

COMMERCIAL SOLAR POWER THAT'S UNRIVALLED FOR QUALITY

Solahart Solar Power systems deliver unrivalled quality, performance and efficiency. By bringing together world-renowned REC solar panels and high-performance SMA inverters you can be assured that you have a commercial solar power system that's second to none.

How it works for your business

- Photons from the sun are turned into electricity by solar panels
- DC current is converted into 240V AC electricity via an inverter for use by your business (up to 100kW)
- A meter measures the amount of electricity your solar system produces
- Any unused AC power may be sent back to the grid subject to network approval



FIVE REASONS TO INSIST ON SOLAHART COMMERCIAL SOLAR POWER

1. Australia's free energy experts

For over 60 years we've been Australia's most recognised name in solar. We've built our business on trust because we take the time to understand our customers' needs. We use this same approach with commercial, where we still believe in face-to-face contact to better understand your unique situation, review your energy bills and inspect your building. Using our proprietary software tool, the Solahart Savings Calculator, we'll then recommend the best system for your budget and your energy consumption. Our solar power systems are only available through authorised Solahart dealers and our professional installers are fully trained to Solahart's exacting standards, Clean Energy Council (CEC) accredited, and only use Solahart approved installation components including racking, isolators and enclosures.

2. An unrivalled commitment to quality and testing

All Solahart Solar Power systems are designed and manufactured for the harshest Australian conditions. Quality is ingrained in everything we do and in every component of our systems, from the glass, to the frames, laminates, electronics and roof-mounting systems. Our key components are rigorously tested to ensure minimal energy losses, maximum energy yields, and strength over the life of your system.

3. Greater efficiency and performance for greater savings

Solahart Solar Power systems deliver amazing savings to your business and are a great way to reduce electricity bills because of their superior efficiency and performance. Our Solahart Savings Calculator is an easy way to estimate the savings you'll make. Also, by installing a Solahart Solar Power system, you could create a more sustainable business using an energy source that's clean and green.

4. Trusted Solahart warranties

With over 60 years in the solar business, we're here for the long haul. Every Solahart Solar Power system is backed by a trusted Solahart warranty. In the unlikely event of a problem, our team of Solahart dealers will be there to fix it!

5. Competitive leasing options

Solahart offers a competitive range of leasing options. If you want to enjoy the immediate benefits of going solar with no deposit and an affordable repayment schedule to minimise the impact on your cash flow, this is a great option to consider.

High-performance SMA inverters

For over 30 years, SMA inverters have been the industry standard for the global solar power industry. That's why we use them in our commercial solar power systems. All SMA inverters are manufactured using 40% less internal parts and more memory functions for greater performance and efficiency. They're so good, both the White House and the Vatican use them in their solar power systems!

World-leading REC panels

The harsh Australian environment demands quality solar power components. That's why we use world-leading REC solar panels which are consistent with Solahart's quality and performance requirements. REC panels are also a great choice for the environment.
