

DENTAURUM AUSTRALIA PTY LTD - MORTLAKE, NSW

ABOUT THE BUSINESS

Dentaureum Australia is the local arm of the German parent company, which has proudly contributed to dentistry around the world for over 125 years. Dentaureum has grown from a simple dental laboratory to a dental company with operations globally. Dentaureum Australia is a highly regarded and very successful dental supplier and partner to leading dental clinics across the country.

As an owner-managed family company in the fourth generation, Dentaureum is independent and flexible, and in a position to respond quickly in a focused manner to market changes through continuous investment in new technology. From the purchase of raw materials through to the finished product, quality is of highest priority. To ensure this, Dentaureum develops and manufactures their products in Germany. With highly qualified employees, apprenticeship and training schemes, continuing research and development and professional management team, Dentaureum continues to strive to improve their position in the face of international competition.

CLIENT TESTIMONIAL

"Solahart made our recent switch to a solar system both positive and effortless. From the original discussions and subsequent meeting, they made the benefits and process all very easy to understand. The system was installed in a few days, and there was next to no interruption to our business at all.

Solahart is very professional and managed the application and all related paperwork, so it was surprisingly simple for us. Now that we are up and running, we check our usage and power generation daily, and it has confirmed in our mind that we have certainly made the right choice.

We consider the whole experience to be very worthwhile and can highly recommend Solahart solar power to anyone."

Col Macpherson, Managing Director - Dentaureum Australia.

THE REQUIREMENTS

With ever increasing power bills, Dentaureum assessed their escalating electricity usage and charges; looking for ways to reduce their bills and also to become as self-sufficient as possible, solar power was an obvious and simple solution.

PROJECT SAVINGS

Estimated savings of almost \$20,000 in the first five years, delivering a payback in approximately four years. Solahart Sydney designed and specified an optimum-sized solar system and recommended a new energy retailer to improve the rate of return and system efficiencies further.

INSTALLATION BY SOLAHART SYDNEY

10kW PV System

Solar Panels:
35 x REC 290W TwinPeak 2 Panels

Inverter:
10kW SMA Sunny Tripower Inverter
