

## CROKERS TRUCK CENTRE - MACKAY, QLD

### ABOUT THE BUSINESS

Crokers Truck Centre Mackay is the leading local dealer for new trucks, parts and servicing of premier brands Isuzu, Mack, UD and Volvo. Established in 1977 on securing the Volvo Truck franchise for Mackay district and hinterland, they have been operating in Mackay QLD, for over 40 years. In 1983 the Isuzu franchise was added, followed by Mack Trucks in 2006 and UD in 2015. Their area of responsibility for these brands extends from St Lawrence in the South, to Bowen in the North and Clermont in the West.

### THE REQUIREMENTS

With power costs rising, Crokers Truck centre assessed their electricity usage and performed a renovation of the lighting systems around the office. Doing this, led them to look for further avenues of environmentally sound, cost-reduction opportunities.

### THE SOLAHART SOLUTION

Solahart Mackay (Five Star Solahart) was selected to develop a solar solution which would satisfy the requirements of providing energy savings and reducing electricity bills. Noel Fordyce, the principal dealer of Solahart Mackay, provided a comprehensive professional service and designed and organised the safe install of 116 high-performance REC solar panels with premium German engineered SMA inverters.

### PROJECT SAVINGS

Estimated initial savings of \$6,800 per year.

It was identified that with the correct size solar system they would be able to change from a demand tariff to a non-demand tariff and achieve savings up to \$1,600 p/m or \$19,200 per year.

### CLIENT TESTIMONIAL

*"Noel & his team from Five Star Solahart made our recent switch to a solar system effortless. From the initial meeting, they made the benefits & process easy to understand and accept. The team that installed the system worked with us so that the interruption to our business was minimal. We did not have to worry about the submission and applications as they were all handled by the Five Star Admin Dept. Now that we are up and running, we check our usage and power generation daily, and it has confirmed in our mind that we have certainly made the right choice.*

*Noel & his team also constantly monitor our system and are on the lookout for any anomalies which is great peace of mind.*

*We consider the whole experience to be worthwhile & can highly recommend this process to anyone."*

*- Ross Kynaston, General Manager*

### INSTALLATION BY SOLAHART MACKAY

**kW** 39kW PV System

 Solar Panels:  
116 x REC 340W TwinPeak 2 Panels

 Inverter:  
10kW + 20 kW SMA Sunny Tripower Inverters
