

HEAT PUMPS JUST GOT SMARTER

INTRODUCING HEMS-COMPATIBLE SOLAHART HEAT PUMPS

Installing a Solahart Heat Pump is a smart way to reduce your hot water energy consumption and your impact on the environment. And now, thanks to new technology, Solahart Heat Pumps are even smarter.

If you already own a Solahart Heat Pump or are considering purchasing one, you now have the option to make it even smarter. Selected models are now compatible with the Solahart Home Energy Management System (HEMS).

How you'll benefit from a HEMS-compatible Solahart Heat Pump

Use the excess solar power you produce from your solar power panels to run your heat pump

Gain greater control of your energy by bringing your connected appliances under a Solahart HEMS

HEMS will orchestrate your home's energy production and consumption needs to avoid expensive peak times

SOLAHART HEAT PUMPS AND SOLAHART HEMS. A SMART COMBINATION.

A Solahart **Home Energy Management System (HEMS)** brings your compatible energy-generating devices, including HEMS-compatible Solahart Heat Pumps, and connected appliances under one monitoring and control platform. By monitoring your system's daily energy production and shifting high-energy consumption connected appliances from peak electricity grid times, you can maximise your solar production and reduce your energy costs. A Solahart HEMS also allows you to take advantage of upcoming technologies via Cloud-based updates and receive automatic fault alerts from managed appliances. And with a Solahart HEMS, you can monitor and control your home's energy devices anywhere, anytime through the atHome web App.

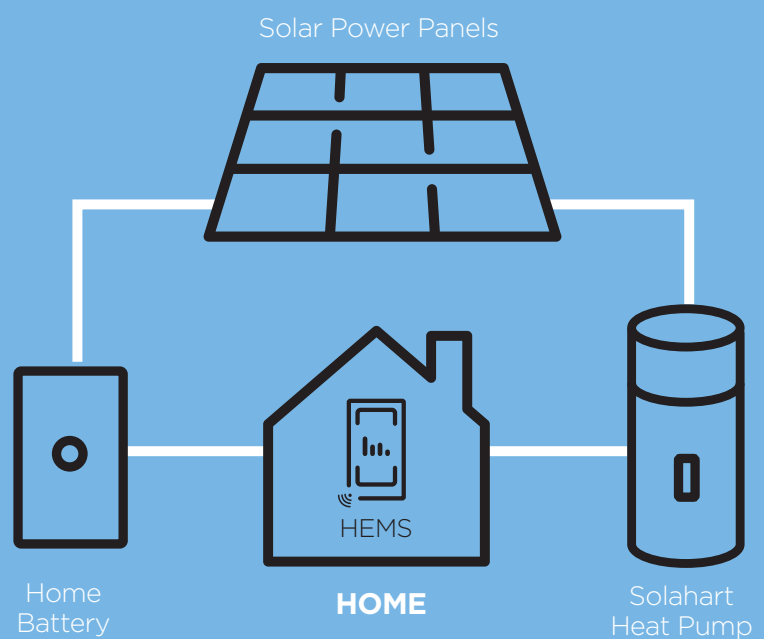

GET SOLAHART HEMS MONITORING FOR 12 MONTHS

Add a Solahart HEMS to your smart energy system today and you can monitor and control your homes connected appliances for 12 months. After one year, you can choose to pay an ongoing subscription for HEMS, or revert to our Basic Monitoring option for no additional cost.

SAVE MORE WITH A SOLAHART SMART ENERGY SYSTEM

Over 3 million Australian homes are now fitted with rooftop solar panels. However, many homeowners are not harnessing the full potential of their solar power systems.

Rather than sending excess solar energy back to the grid for minimal financial return, it makes sense to add Home Battery and a Solahart Heat Pump to your solar power system then monitor and manage it with a Solahart Home Energy Management System.

To take control of your energy future with a Solahart HEMS-compatible Heat Pump, contact your local Solahart Dealer on 1300 721 984. or visit solahart.com.au

Solahart
ENERGY *Free* FROM THE SUN®

*Connected appliances refers to appliances that allow control by the HEMS Energy Management Unit. For more information, please contact your local Solahart Dealer.
